How do we make sure our wood is a 100% renewable energy supply?

Check List for Sustainable Firewood Collection

- ✓ Is it legal to collect wood from this area?
- ✓ Has the tree naturally died and fallen over?
- ✓ Are there lots of replacement saplings near-by?
- ✓ Are there plentiful other homes for wild life?
- ✓ Is there abundant dead timber to stabilize gullies?
- ✓ Is there abundant dead timber to slow down run-off?
- ✓ Can the nutrient rich bark be left in the paddock?

Tree fallen in a storm with regrowth at stump and healthy young saplings in the back ground.

Perfect décor for a lizard!

Snug echidna shelter

Rich bark decaying to recycle nutrients

Great bird apartment in a standing dead tree

Gully head protected from erosion

Good grass growth where timber slows run-off
